A low-angle shot of a building's exterior wall during a waterproofing test. The wall is covered in vertical wooden planks and is being sprayed with water from a high-pressure hose. The water spray is visible as a misty cloud against the wall. To the right, a metal scaffolding structure is visible, consisting of vertical poles and horizontal cross-braces. The sky is visible in the background, appearing overcast.

Is modular building can only be built in a boring way?

模块化建筑是否会破坏建筑的美感？

No, it can be built in different way.

Modular can be SEXY.

模块化也可以很性感

And that's what we are doing.

Thank you.

谢谢
