## **Supply and Installation of Energy Efficient Ventilation Fans – Sponsorship Agreement Signing Ceremony**

As the first zero carbon building in Hong Kong, ZCB is striving to keep up with the latest technology developments for increasing energy efficiency and reducing carbon emissions. Thanks to BAFCO Hong Kong Ltd.'s generous support, the popular high-volume-low-speed ventilation fans will be upgraded with the newer generation of technologies not only for further increasing the energy efficiency whilst enhancing the level of occupants' comfort. The replaced ventilation fans will be reused to improve the air conditioning and energy efficiency in the other CIC offices.

The sponsorship agreement signing ceremony was held at ZCB on 19 August 2014. The sponsorship includes replacement of all the existing ventilation fans with the latest generation of products and installation of some additional fans to improve the ventilation in the public toilets within ZCB.
