The Construction Industry Council (CIC) would like to deliver this safety message for your attention. It would be much appreciated if you could distribute the message below to your fellow members, relevant personnel or other industry stakeholders where appropriate. Thank you very much.

Common Accidents

1. Failure to develop a comprehensive Construction Site Traffic Management Plan.
2. Unable to separate vehicular and pedestrian traffic.
3. Failure to follow the site traffic instructions, including speed and safety operations.
4. Failure to use the pedestrian facilities or unaware of the vehicles in construction sites.
5. Failure to acknowledge and handle the traffic risks and hazards induced by the changes in the procedure or environment.

Critical Control Measures

1. Develop a comprehensive Construction Site Traffic Management Plan.
2. Implement safe working procedure for vehicle operation.
3. Appoint Traffic Controller to manage and control site traffic issues.
4. Make use of dynamic risk assessment to manage traffic risks and hazards induced by the changes in procedures or site environment.

Develop a comprehensive Construction Site Traffic Management Plan.

Appoint Traffic Controller to manage and control site traffic issues.
