Life First - Walk the Talk Seminar

11 February 2026

BUILDING FOR LIFE

Summary

- 1 Fingerprint System for MEWP
 - 2 Self-Balancing Lifting Frame
 - 3 Semi-Modular Falsework Tower
 - 4 Modular Spiral Access Tower
 - 5 Asset Management: Lifting Gear
- 

1. Fingerprint System for MEWP

Challenges and Pain points: ⚠️

1. Unauthorised operation (unauthorised operators / defective plant)
2. Difficult in identifying authorized MEWP operators on-site
3. Absence of operation logbook / historical data
4. Serious accident involving MEWP

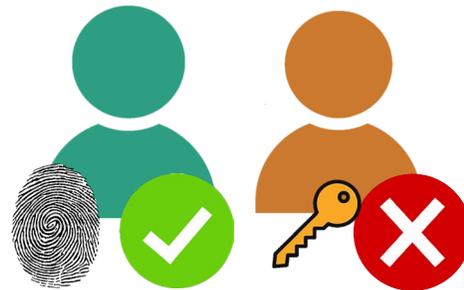

1. Fingerprint System for MEWP

Biometric validation devices for Moving plants

The benefits of the solution

-  Ensure that only authorized person can operate
-  Applicable to all machines with key starter
-  Plant operation data is recorded automatically
-  Real-time fleet management via 4G network
-  Registration in off-line mode available

1. Fingerprint System for MEWP

Fleet Management System (Machine and Operator)

Stop the **Machine** and **Operator** if:

Compulsory repair
required

License
Expired

Statutory
Certificate
Expired

Operator

Poor safety
performance

Non-working Date / Time

1. Fingerprint System for MEWP

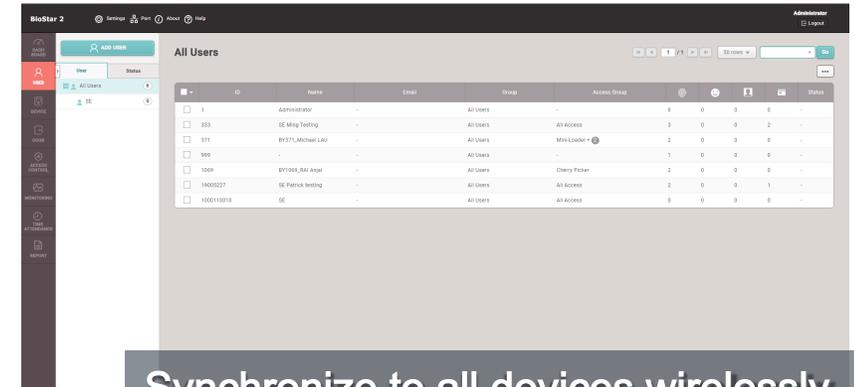

4G Router

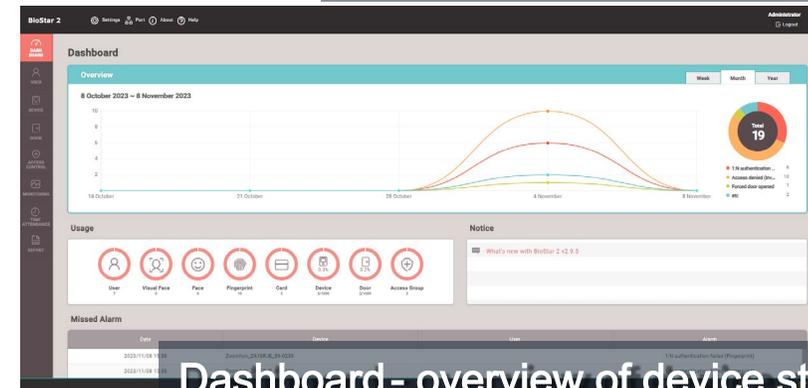

Biometric Reader

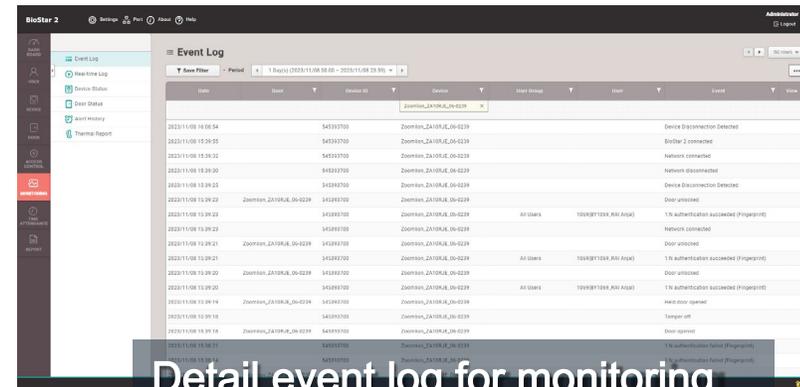

Control Center

Synchronize to all devices wirelessly

Dashboard - overview of device status

Detail event log for monitoring

2. Self-Balancing Lifting Frame

ONE lifting frame:

MiC
648 Nos.

Weight
27 ton

Type
9

2. Self-Balancing Lifting Frame

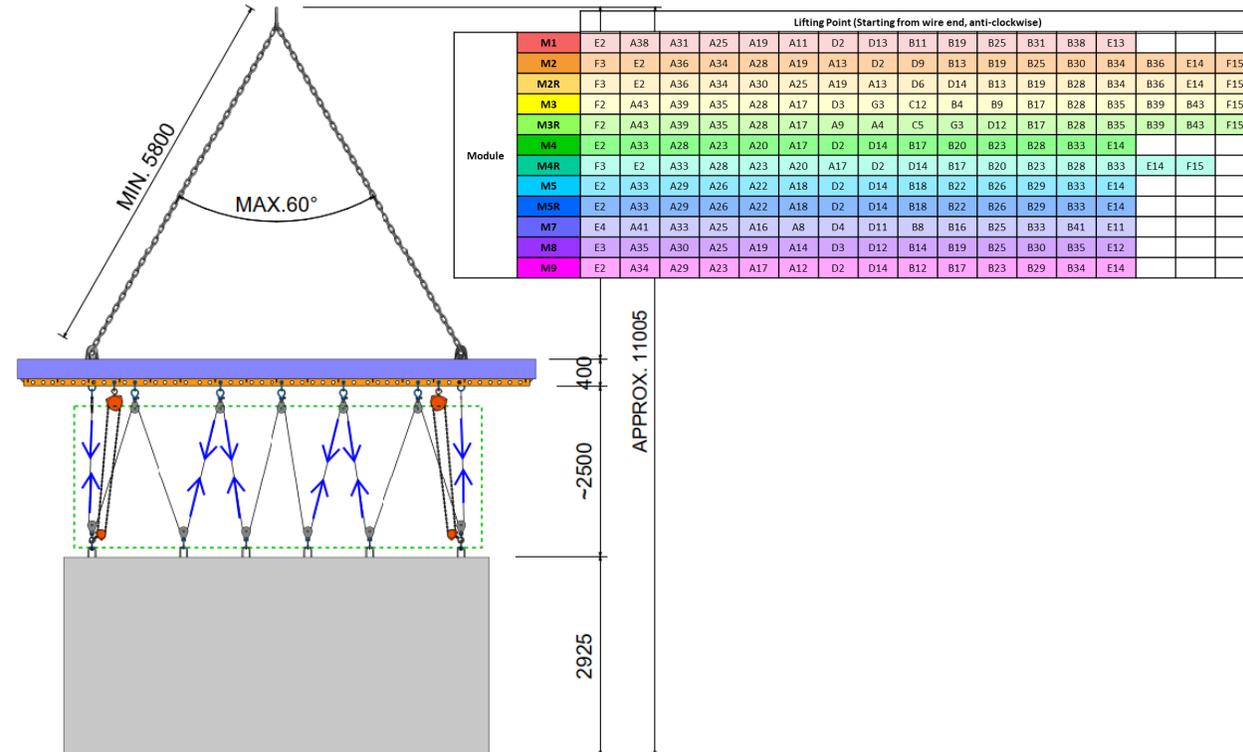

! Conventional Method (lifted by chain blocks)

- Stresses vary at different lifting points
- Both under-utilized and highly stressed lifting points occur even visually at balance state

Self-Balancing Lifting Frame

- Pully and wire system
- Secondary support by 4 chain blocks

2. Self-Balancing Lifting Frame

Advanced engineering for safer and faster modular construction

Operational Efficiency

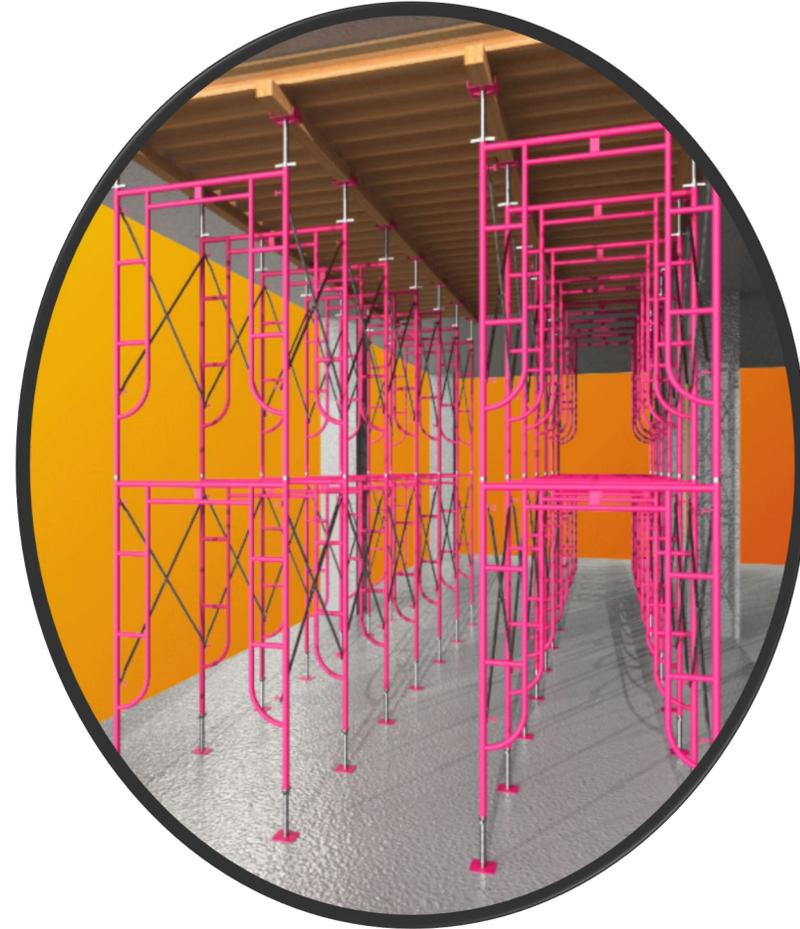

-  **Average lifting time: 7 minutes per MiC module, significantly reducing workers' workload.**
-  **Eliminates the need for manual adjustment of lifting gear lengths for different modules.**
-  **Cost-effective solution: one universal frame is compatible with all module types.**

Safety & Precision

-  **Uniformly distributed stress and tension along the wire for structural integrity.**
-  **Pre-defined configuration ensures optimal Center of Gravity for every lift.**
-  **Safe and simplified rigging method reduces the risk of human error on-site.**

3. Semi-Modular Falsework Tower

- ⚠️ **Standard working platforms?**
- ⚠️ **Safe access?**
- ⚠️ **Fall protection?**
- ⚠️ **Rigid anchor points for safety harness?**
- ⚠️ **No proper lifting points**
- ⚠️ **Install each component one by one**

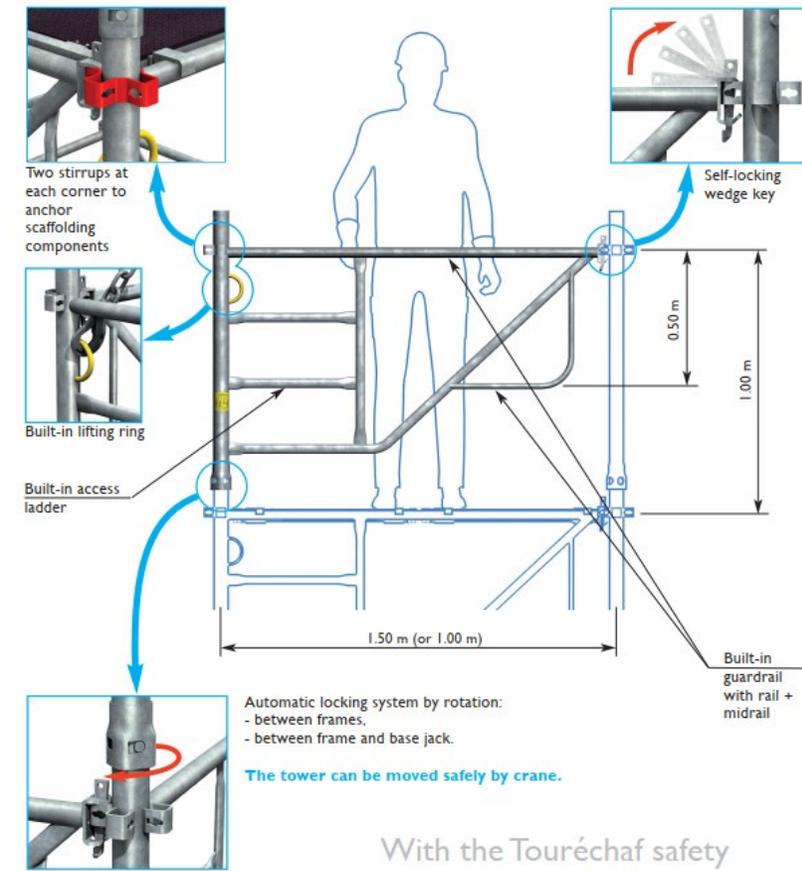

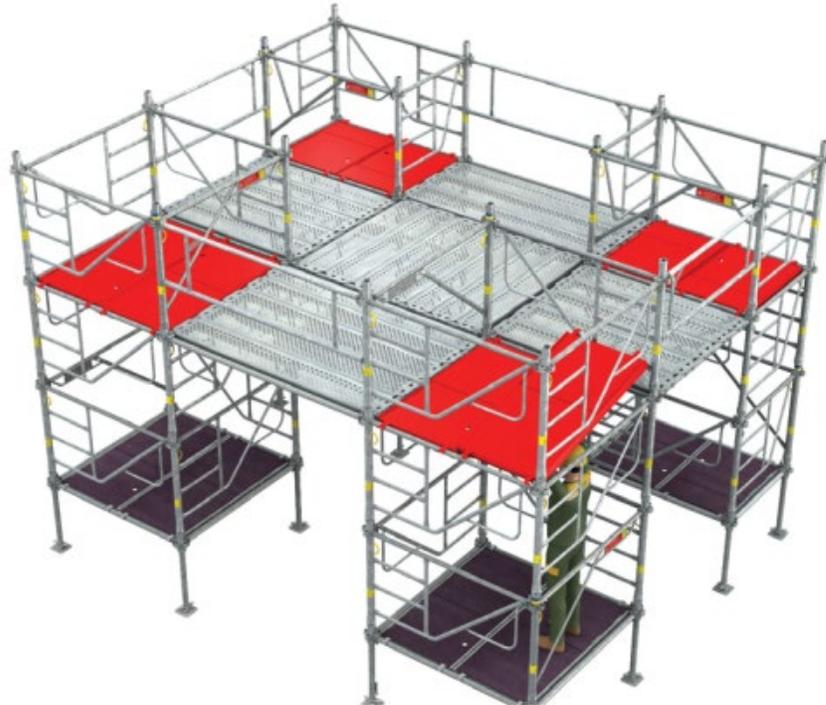

3. Semi-Modular Falsework Tower

The shoring tower with integrated safety features. It's innovative design and semi-modular, makes it easy to install and safe to work with.

3. Semi-Modular Falsework Tower

- Four identical frames for each level.
 - Safety: top rail, mid rail, access ladder
 - Automatic locking without pins
 - A lifting ring
- Unit weight of normal wear parts less than 15 kg to reduce MSI.
- Compatible with proprietary scaffolding system.

With the Touréchaf safety

4. Modular Spiral Access Tower

Typical Access Tower

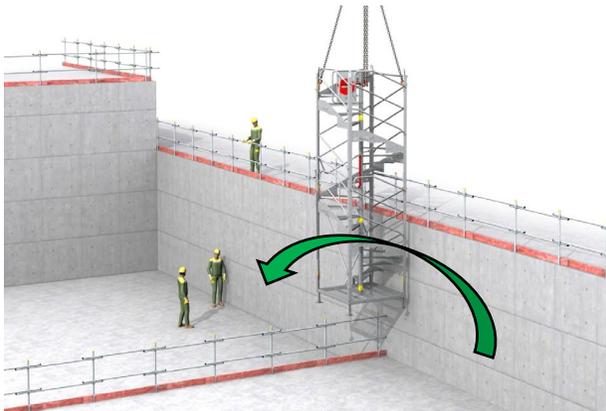

- ! Install each component one by one
- ! Involve frequent lifting
- ! No fall protection while erecting posts and guardrails

4. Modular Spiral Access Tower

- Erection and dismantling using collective protection with built-in guardrails.
- Fast and simple installation of modulars.
- Access tower can be lifted by crane.
- Compact footprint (1.68m x 1.68m).

5. Asset Management: Lifting Gear
