CIC Sustainable Construction Award Conference and Presentation Ceremony Goes Virtual for the First Time

Hong Kong • 14 November 2020 - The Construction Industry Council (CIC) launches its second Sustainable Construction Award (SCA) this year to recognise sustainability best practices among organisations and practitioners, in particular the young generation of the construction industry. Going virtual yesterday, the SCA's Conference and Presentation Ceremony (Ceremony) allowed everyone to participate in this exciting event and gain more insights on the new direction in sustainable construction from the renowned speakers and awardees.

The Award consists of two categories, namely "Organisations" and "Industry Practitioners", awarding 29 winners from "Organisations Category" and 18 winners from "Industry Practitioners Category" (Annex 1), with a total of over 2,000 industry practitioners participated.

At the Ceremony, Mr. Michael WONG, Secretary for Development said that the SCA was of great significance, and the sustainable development of Hong Kong construction industry greatly depends on the support from the industry. In view of the importance of sustainable construction, Mr. WONG mentioned that the government planned to issue green bonds totalling approximately HK\$66 billion to promote the development of sustainable construction and the CIC is assisting the construction industry in obtaining green loans by formulating the "Sustainable Construction Certification Scheme for Green Finance". The scheme aims to promote the development of green finance in Hong Kong.

Mr. CHAN Ka-kui, Chairman of CIC, said at his opening speech that the SCA provided an excellent platform for the outstanding organisations and industry practitioners to share knowledge and valuable experience in innovative technologies and green materials. He congratulated the awardees again and praised their outstanding performance in sustainable construction.

Dr. MA Jun, Chairman and President of Hong Kong Green Finance Association shared his insight and knowledge on Green Finance Opportunities in China and Greater Bay Area and top winners shared their experience on the green finance opportunities and new era

of sustainable construction. This year the topic of the panel discussion was “New Era of Sustainable Construction”. Moderated by Mr. Paul CHONG, Chairperson of Organising Committee of the CIC Sustainable Construction Award, Mr. Ivan FU, Chairperson of Committee on Environment of the CIC, together with judges and winners discussed the challenges and opportunities in promoting sustainable construction in Hong Kong. They also exchanged views on subjects such as talent cultivation, green finance and low carbon construction technologies to explore their significance and role in the future of sustainable construction in Hong Kong.

Mr Albert CHENG, Executive Director of CIC, expressed deep appreciation to all contestants as their projects were the role models of sustainable construction. He added “Every single person in the industry plays an important role in the development of sustainable construction. The CIC will work together with the industry stakeholders to promote sustainable construction in Hong Kong.”

The award trophies this year are made of recycled concrete and materials which obtained the CIC Green Product Certification, implementing the sustainable construction concept on waste reduction and carbon reduction.

About the Construction Industry Council

The Construction Industry Council (CIC) was formed in 2007 under the Construction Industry Council Ordinance (Cap. 587). The CIC consists of a chairman and 24 members representing various sectors of the industry including employers, professionals, academics, contractors, workers, independent persons and Government officials.

The main functions of the CIC are to forge consensus on long-term strategic issues, convey the industry's needs and aspirations to the Government, provide professional training and registration services, and serve as a communication channel between the Government and the construction industry.
