

**FOR IMMEDIATE RELEASE**

## **CIC BIM Competition 2022 Completed Another Year of Success**

**Hong Kong • 20 June 2022** – The "CIC BIM Competition 2022" organised by The Construction Industry Council (CIC) completed successfully with an award ceremony held on 18 June 2022.

For the fourth year, the Competition continues to promote the practical uses of Building Information Modelling (BIM) through a collaborative and competitive learning approach among higher education students in construction-related disciplines. The theme of the Competition was "Modularity & Adaptability in Transitional Housing (T-Housing) Design with Use of BIM". The participating teams of 3 to 5 full-time higher education students from two or more construction disciplines demonstrated their expertise and creativity to design modular T-Housing for relieving the pressure of families living in poor conditions.

Ar. Prof. Ada FUNG, Chairperson of the Committee on BIM of the CIC said at the Ceremony, "In the view that the adoption of Common Data Environment (CDE) in the workflow helps ensure that the BIM model developed can serve as a single source of truth for collaboration throughout the whole project life cycle. All stakeholders such as owners, consultants, contractors, and subcontractors can apply BIM on the same platform to ensure the unified information of all project participants. Therefore we include CDE, for the first time, as one of the submission requirements. It is hoped that through the Competition, students would experience digital project coordination and collaboration using CDE."

Students competed in two rounds of challenges. In the 1<sup>st</sup> round, project design requirements were given to the teams in designing the residential blocks by reusable Modular Integrated Construction (MiC) units, together with supporting communal facilities on a designated site. In the 2<sup>nd</sup> round, the ten finalist teams selected by the judging panel were given new requirements such as adding kindergarten classrooms and to revise their 1<sup>st</sup> round submission onsite based within 12 hours and conducted the final presentation to the judging panel the next day.

### CIC BIM Competition 2022 - List of Winning Teams

Awards	Team	Institutions
1 <sup>st</sup> Runner-up	Urban Theorist	i. Chu Hai College of Higher Education ii. The Technological and Higher Education Institute of Hong Kong
	YWEB Studio	i. The Hong Kong Design Institute ii. The University of Hong Kong
	我仍想努力群組	i. Chu Hai College of Higher Education ii. The University of Hong Kong
2 <sup>nd</sup> Runner-up	Revitary	i. The Hong Kong Polytechnic University ii. The University of Hong Kong
	Vanguard	i. The University of Hong Kong
Merit	Aces	i. The University of Hong Kong
	ArchiBim	i. The Hong Kong Design Institute ii. The Technological and Higher Education Institute of Hong Kong
	Dream Explorers	i. The Hong Kong Institute of Vocational Education
	Make Dream Come True	i. The Hong Kong Design Institute ii. The Technological and Higher Education Institute of Hong Kong
	Poly-Thei Joint Venture	i. The Hong Kong Polytechnic University ii. The Technological and Higher Education Institute of Hong Kong
Best Presentation Team (Live online voting)	Revitary	i. The Hong Kong Polytechnic University ii. The University of Hong Kong

### **About the Construction Industry Council**

The Construction Industry Council (CIC) was formed in 2007 under the Construction Industry Council Ordinance (Cap. 587). The CIC consists of a chairman and 24 members representing various sectors of the industry including employers, professionals, academics, contractors, workers, independent persons and Government officials.

The main functions of the CIC are to forge consensus on long-term strategic issues, convey the industry's needs and aspirations to the Government, provide professional training and registration services, and serve as a communication channel between the Government and the construction industry.

Please visit [www.cic.hk](http://www.cic.hk) for further details.
