Dear Contractors,

The Construction Industry Council (CIC) has been taking a leading role in fostering a caring and safety culture in the construction industry. In order to enhance the comfort of construction workers at work, the CIC will start selling Construction Industry (CI) Anti-Heat Stress Uniform from September 2016 onwards.

Designed by the Hong Kong Polytechnic University, the CI Anti-Heat Stress Uniform is made from Coolmax fabric and a new generation of moisture-management textiles made from nano-materials. With excellent one-way transferability and liquid moisture management capacity, this new technology improves fabric breathability, speeds up sweat evaporation and helps construction workers to reduce heat stress at work. This new set of CI Anti-Heat Stress Uniform is lighter and thinner, yet able to provide better UV protection to construction workers than the existing design.

The price and size information and an order form of the CI Anti-Heat Stress Uniform are enclosed for your reference. If you are interested to place an order, please send a duly completed order form with a copy of bank slip by E-mail to info@angieuniform.com, or with a crossed cheque by post to Unit 2E, 1/F, Fuk Hong Industrial Building, 60-62 Tong Mei Road, Mongkok, Kowloon, Hong Kong.

For enquiries, please contact Mr. Tang or Mr. Fong of Angie International Limited at Tel.: 2777 7623.

Yours faithfully,
For and On Behalf of
Construction Industry Council
