

New Repair, Maintenance, Alteration and Addition (RMAA) Intermediate Tradesman Collaborative Training Schemes and Certificate Programmes

With a view to increasing the supply of skilled workers, the Development Bureau has issued the Technical Circular (Works) No. 6/2019 on the implementation of mandatory construction industry collaborative training schemes (CICTS) in public works contracts under the Intermediate Tradesman Collaborative Training Scheme (ITCTS) administered by the Construction Industry Council (CIC). The technical circular recognises participation in ITCTS for fulfilling the mandatory requirements on worker training for their public contracts.

To better equip for the current needs of the market, CIC is pleased to announce the launch of two new ITCTs:

Repair, Maintenance, Alterations and Additions (Building Construction)

Repair, Maintenance, Alterations and Additions (Electrical and Mechanical)

Both of them can fulfil the existing required training quotas for public works and help equip the trainees in the growing Repair, Maintenance, Alterations and Additions (RMAA) market. The two new schemes not only focus on developing the multi-trade skills required within the RMAA industry, such as wet and dry trades, plastering, painting, plumbing, E&M works and more, but also include an enhanced safety awareness course and customer services training. CIC is proud to have developed these new multi-trade schemes and hopes to elevate the quality of works in our trainees.

CIC in parallel has developed two full-time certificate programmes (the “Programmes”) as an alternative to the above ITCTSSs, namely the Certificate in Repair, Maintenance, Alteration and Addition (Building Construction) and Certificate in Repair, Maintenance, Alteration and Addition (Electrical and Mechanical). The above 90 days and 95 days programmes respectively are in line with the ITCTSSs where the graduates will also be equipped with enhanced safety awareness and customer services as well. Through these Programmes, the graduates will be able to handle all general matters required by the RMAA industry and can be valuable assets to contractor companies looking for multi-trade individuals to handle RMAA matters.

CIC solicits the support of all government departments, contractors, property management companies and other interested parties in the RMAA industry to:

1

Employ the Graduates in their Works and Projects

2

Allow the Graduates to Participate in Skillful Works in Specified RMAA Trades

3

Recognise the Qualification of the Graduates in their Ability to Handle RMAA Works

We hope that the new ITCTSSs and the Programmes on RMAA (Building Construction) and (Electrical and Mechanical) will be able to better supply the market with quality multi-trade workers that the RMAA industry needs.
